

Our students given a second chance:

Become conditioned: Develop a “can do” attitude through step by step hands on experience.

Innovate: Bridge the gap between concept and reality the same way as do today’s engineers.

Gain proficiency: In skills, knowledge, attitudes, and behavior.

Receive understanding: Take home instructions for free CADD download on school, library, or home computers.

Practice: Using the most indispensable tool by today’s Engineers ...3D CADD

Gain welding tips: by a manufacturing veteran welder.
